- Code review

Round 1 - Screening round by college staff

- Questions were from the skills in resume and project
- Basics of cloud and DevOps
- And maintain a good GitHub profile with your projects uploaded

Round 2 - Screening round by college Alumni

- Questions were a little bit deeper from our technical skills and project , Cloud and DevOps
- Be strong in basics of your technical skills
- Have a good knowledge on cloud and DevOps

Round 3 - Technical HR round from Presidio

- The questions were started from basics and were asked in detail
- Questions from cloud technologies like Kubernetes etc and DevOps
- Be strong and confident in what you have mentioned in resume also make sure you know the basics of important topics like Data structure
- I was asked 2 problems
  - Consider a train seating arrangement: 1 2 3 - Pathway - 4 5 6 7 - Pathway - 8
    - 1, 4, 5, 8 – Window seat
    - 2,6 – center
    - 3,7 – aisle
    - Given a seat number, you need to tell which seat is it
    - Solved it using Hashing
  - String reverse program without inbuilt function and without extra variables

Round 4 - Task development round and Code review

- 2 tasks were given based on our skills
- My tasks were
  • E-Commerce Web/Mobile Application
  • Deploy Meeting Room Booking System application on EC2 Instance and Docker with 2 separate containers for frontend and backend and make sure they are communicating with each other
- Code review will be done after 1 day and we have to explain our tasks and how we did them
- Questions will be asked from the methods you used to do it.
- Google can be used to solve given tasks
